

# Hospital 2.0 Alliance – Construction Partner Profile

## **Bovis Construction (Europe) Ltd** Building Relationships

Founded in 1885, Bovis has delivered some of the UK's most recognisable buildings. From Lloyds of London to our current refurbishment of Manchester Town Hall, we have a long history of delivering complex, high-quality projects for public and private sector organisations.

Our experience is wide-reaching and encompasses hospitals and laboratories; as well as commercial office space; prisons; cultural and university buildings; and residential developments. And with key offices in London, Manchester and Birmingham, together with strategic hubs across the UK, we can mobilise our teams to meet client needs regardless of geography.

We build with precision, innovation, and care, putting safety and quality first and embedding sustainability in everything we do, directly impacting society through our involvement in high-quality projects that drive economic development, enhance the built environment, and support local communities.

Above all, we take a collaborative approach to delivering projects, looking beyond the value of the contract and investing in building long-term partnerships. We will build on our extensive experience of Alliancing with key public sector clients to work collaboratively with fellow alliance members, trusts and the NHP, to support the hospitals programme and deliver assets which meet client requirements and customer needs.

### **Sector expertise**

Whether it's pushing the boundaries of design in laboratory space or working on a multi-disciplinary project at a UK hospital, we collaborate with our clients to explore innovative solutions across a wide range of sectors and specialisms.

### **Healthcare**

Encompassing clients from both the NHS and private sector, our healthcare expertise ranges from the provision of new hospitals to the refurbishment of existing wards, clinics and operating theatres.

### **Life sciences**

Bovis' life sciences capability ranges from laboratories and pharmaceutical manufacturing plants to research centres and teaching facilities. Our experience is UK-wide and includes work for a diverse range of blue-chip clients such as Imperial College London, GlaxoSmithKline and Astra Zeneca.

### **Defence**

As a long-term MOD partner, Bovis is focused on providing modern, sustainable facilities that will serve our Armed Forces well into the future. As part of SLAM - one of

the largest new build and refurbishment projects in the UK – we delivered upgraded and new living accommodation across the UK. We are now delivering multiple projects using an Alliancing approach, as part of the DEOP army infrastructure programme.
