Hospital 2.0 Alliance – Construction Partner Profile

Integrated Health Projects (IHP) is a leading provider of outstanding healthcare solutions. An integrated alliance between two of the most stable and established names in the UK and international construction industry, VINCI Building (VINCI) and Sir Robert McAlpine (SRM), IHP was formed in April 2003 specifically to focus on delivery of healthcare projects.

We are proud of our continuous role on all 4 of the ProCure Frameworks since 2003. We are also delivering under the NHS Building for Wales framework. IHP was also appointed to NHP's Hospital 2.0 Alliance in March 2026.

IHP has been appointed onto Lots 1,2 & 3 of the CCS/NHSE CWAS2 (ProCure23) Framework since 2022, and additionally both VINCI and SRM have been separately appointed to Lot 5 under which VINCI and SRM have agreed to adopt a JV/Alliance using the IHP Brand for the purpose of bidding healthcare projects only.

IHP key numbers at time of review:

- Projects we have been appointed on – 300+
- Total value of these Projects – circa £4.49bn
- Number of NHS and LA Clients – 100+
- Repeat appointment Projects – 85%

Along with the formidable cover and security provided by each of the joint venture partners, IHP offers a comprehensive development, design, construction and facilities management service.

IHP achieved outstanding recognition in 2025, securing 30 awards across ProCure schemes, including North View, which secured multiple top honours with Best External Environment/Landscaping and Clinician's Choice at the Building Better Healthcare Awards. Hellesdon Rivers Centre celebrated strong success in winning Silver for Best Mental Health/Dementia Care Development at the Building Better Healthcare Awards and securing New Build Project of the Year at the IHEEM Healthcare Estates Awards.

The Sulis Elective Orthopaedic Centre (SEOC) was named Project of the Year for Healthcare (Secondary/Tertiary Care) at the MMC Awards, recognising excellence in modern methods of construction and patient centred design. The Patterson Building won Best New Building, celebrating its high quality, research led design. Together, these achievements highlight exceptional performance, innovation and leadership across healthcare design, mental health facilities, elective care, and emergency care.

IHP were honoured to have been called upon to support the NHS in the COVID-19 national crisis. We have delivered a number of emergency projects including the 750-bed Manchester Nightingale Hospital in just 13 days!

We are committed to achieving the benefits available to clients, working together to provide better value for money through imaginative and sustainable solutions which offer capital, operational and life-term efficiencies.

Integrated Health Projects by

New Hospital Programme

As well as a fully integrated named supply chain experienced in all facets of healthcare, we bring to every project the technical expertise, robust cost control and programme management skills needed to safely deliver good value, high quality facilities on time and within budget.

While we aim for excellence in design and construction, we recognise that a build solution may not always be the answer. Whatever the requirements, on every project we aim to work in partnership with our clients to develop innovative and forward-thinking solutions which will meet their service provision and business needs long into the future.
